

CAREER COUNSELLING SESSION BY OUR ALUMNI

Introduction to Various Career Options in Psychology

Monday, 22nd April 2024

A workshop was conducted for Class XI and XII Psychology students led by our alumni Ms. Arushi Madaan (Batch 2017), aiming to broaden their understanding of career possibilities in psychology. Ms. Madaan discussed the burgeoning demand for psychologists in India, particularly in clinical, counselling, and organizational sectors, as well as opportunities abroad, especially in Western countries. Emphasis was placed on exploring non-mainstream career paths such as sports psychology, environmental psychology, health psychology, and neuropsychology, each offering distinct avenues for research, consulting, or clinical practice. Students were enlightened about the significance of obtaining the correct degree, licensing, and adhering to ethical standards in the field of psychology. The workshop concluded with an encouragement for students to explore the vast array of opportunities available in psychology, highlighting the importance of education, ethical conduct, and ongoing professional development for a prosperous career in the field.
